

FUNDING RECEIVED FROM THE NINEVEH CHARITABLE TRUST

In October 2019 Landmarks received a grant of £5,000 from The Nineveh Charitable Trust towards work at our farm provision – Apperknowle Farm in Dronfield. At the 7-acre farm site, we provide a "real life" working and training environment for young people and adults with special educational needs. Our on-going plans include raising our own livestock and producing our own vegetables and fruit, all of which will be utilised within the College Bistro and the College pub The Archer, serving the general public. Learners are engaged in every step of the process from breeding programmes, sowing seeds, planting orchards through to ensuring produce gets to the relevant catering environments.

With the grant from the Trust we purchased "reinforced cattle pens" in our barn, allowing us to begin our breeding programme on the farm. During the last year we have had lambs and a new calf on the farm and in 2021 we are planning to expand the breeding programme further.

The College is extremely grateful to The Nineveh Trust for their grant as this has allowed us to go forward with our breeding programme and build on this for next year. Photographs showing the cattle pens:
